

MAKE AN ODD SOCK AMMONITE

1. Push the stuffing into the sock. Use a ruler or pencil squeeze it down.

2. Leave about 2 inches free at the top.

3. Tie the string round the toes of the sock and keep wrapping it around

4. Make a ball at the end of the wrapped string and then tie it off. Discard the additional stuffing at the end.

5. Roll the sock into a snail shell with the head at the end. Poke a string through a gap as shown and tie it around the head to hold the spiral together.

6. Stick on an eye and your Odd Sock Ammonite is good to go!
